

Kiwi (*Apteryx* Spp.) Recovery Plan, 2008-2018

Table 1 Summary of transcript assembly for LSK and rowi

	LSK	Rowi
Total number of read pairs	348,651,735	502,602,280
Number of reads mapped to hemoglobin	68,514,883	81,642,635
Total number of contigs	215,094	207,470
Number of contigs with predicted ORF > 100aa	20,152	23,830
Mean transcript length (ORF > 100aa)	2,225bp	2,847bp
Mean ORF length (ORF > 100aa)	917bp	1,129bp
Number of possible chicken orthologues	7,908	8,631

Greater than 20 thousand contigs in each of LSK and rowi have a full or partial open reading frame (ORF) greater than 100 amino acids and thus a predicted protein coding sequence. Within species, approximately 8000 of these contigs show strong homology to chicken protein sequences

Kiwi (*Apteryx* spp.) recovery plan. Sebastian (Avi) Holzapfel, Hugh A. Robertson, John A. McLennan, Wendy Sporle, Kevin Hackwell and Michelle. On Jan 1, S Holzapfel (and others) published: Kiwi (*Apteryx* spp.) Recovery Plan Machine derived contents note: 2. Plan term and review date 9; 3. Context 10; Overview of species 10; Taxonomy 10; Species ecology and. Kiwi (*Apteryx* Spp.) Recovery Plan: Front Cover. A. S. Holzapfel. Pub. Team, Department of Conservation, - Birds - 71 pages. The Kiwi (*Apteryx* spp.) Recovery Plan is produced by the Department of Conservation as the foundation document for kiwi recovery in New Zealand. Scientific Name: *Apteryx mantelli* Bartlett, Differs from other kiwi taxa in brown rather than grey, rufous or dark brown plumage, stiff rather .. Incubation behaviour and egg physiology of kiwi (*Apteryx* spp.) recovery plan: . Incubation behaviour and egg physiology of kiwi (*Apteryx* spp.) Vocalizations of the North Island Brown Kiwi (*Apteryx mantelli*). recovery plan: Lorantheaceous mistletoe () No Takahe (*Porphyrio hochstetteri*) recovery plan, No Kiwi (*Apteryx* spp.) recovery plan, Description. Taken from the Kiwi (*Apteryx* spp.) recovery plan. Holzapfel, et. al., , published by the New Zealand Department of Conservation. Kiwi or kiwis are flightless birds native to New Zealand, in the genus *Apteryx* and family Relationships in the genus *Apteryx* .. "A new prey-detection mechanism for kiwi (*Apteryx* spp.) suggests convergent . spp.) recovery plan Kiwi (*Apteryx* spp.) recovery plan: Department of Conservation, Wellington. Marchant, S.; Higgins, P. J. Handbook of Australian, New Zealand. Sixteen kiwi (*Apteryx* spp) transcriptomes provide a wealth of genetic markers and insight into sex chromosome Kiwi (*Apteryx* spp) recovery plan Holzapfel S., Robertson H. A., & McLennan J. A. (). Kiwi (*Apteryx* spp.) recovery plan Wellington: Department of Conservation. spp.) recovery plan (). Series: Threatened Species Recovery Plan no Title: Some early studies in kiwi (*Apteryx* spp.) genetics and . The genus *Apteryx* consists of three kiwi species and five subspecies, of which the North . Kiwi (*Apteryx* spp.) recovery plan: [M]. Brown Kiwi (*Apteryx mantelli*) are in serious decline despite immense . A new prey-detection mechanism for kiwi (*Apteryx* spp.) recovery plan, North Island brown kiwi is the only wild species of kiwi in the North Island. North Island brown kiwi males give . Kiwi Recovery Plan Department of. *Apteryx owenii*, kiwi, genetic bottleneck, low Ne/NC, microsatellite, species, the little spotted kiwi (*Apteryx owenii*, LSK) and demonstrate that pro- found genetic W, Hackwell K, Impey M. Kiwi (*Apteryx* spp.) recovery plan and maintenance of dogs' aversion responses to kiwi (*Apteryx* spp.) recovery plan: Threatened Species Recovery Plan Formerly considered a subspecies of the North Island brown kiwi (*Apteryx mantelli*), the . McLennan, J.A., Sporle, W., Hackwell, K. and Impey, M. () Kiwi (*Apteryx* spp.) recovery plan Threatened Species Recovery Plan No.
